Hi,

I agreed with you it does appear to give flexibility regarding the methodology for measuring the amount of plastic bottles, against which the collection targets should be based and single use plastic products. Producers would obviously be in favour of having that element of flexibility.

Best Regards,

Tony

Subject: RE: SUP Proposal

Hi,

Further to email on Friday I just wanted to run the following text changes by you in both the Recital and the main text.

In recital 20 the following new text has been inserted in relation to the collection target for beverage containers

“The setting of the collection target should be based on the amount of plastic bottles placed on the market in a Member State or alternatively on the amount of waste plastic bottles generated in a Member State. The calculation of the weight of waste generated in a Member State should take due account of all waste plastic bottles generated, including those littered that escape waste collection systems”

Similar text appears in Article 9.1 the following text has been added:-

“Single-use plastic products listed in Part F of the Annex placed on the market within a Member State may be deemed to be equal to the amount of waste generated of such products, including waste littered, in the same year in that Member State.”

It looks ok to me as it give flexibility but would welcome your comments.

Thanks
