## Minutes of meeting with Ifpi on DSA

*Meeting participants: Ludvig Werner (Ifpi) and Gustaf Molander and Berfin Eken (I ESD)*

The meeting was held at the initiative of Ifpi and aimed to elaborate on some of the views they have on DSA.

Is there a consensus within the creative industries in Europe on these considerations?

What is a search engine and why classify it/limit it as a caching service? I'd rather not define it at all. To be judged by what the search engine actually did. Better to avoid creating an unnecessary safe harbour.

KYCB principle extended in recital 39 but not in the corresponding article. They interpret this as EP being in favour of an extension.

Disagrees with the wording in recital 26 that "Where possible, third parties affected by illegal content transmitted or stored online should attempt to resolve conflicts relating to such content without involving the providers of intermediary services in question."

Notice and action - how quickly can a platform be expected to fix a problem?

Opposes the wording of EP proposal 14:3a and EP Article 1a(4) as it is not for COM to determine the scope of the Regulation after it has been adopted.

Reason 26 for diffuse, that you are expected to have worked with the person who uploaded the material.

The meeting was closed.
