- [REDACTED]
- [REDACTED]
- [REDACTED]

DG GROW:

- [REDACTED] REACH
- [REDACTED] - REACH
- [REDACTED] REACH

- FPP4EU is a sector group of CEFIC. The group was set up to represent the views of producers, importers, and users of fluorinated products and PFAS and other parties with an interest in the fluorinated products and PFAS sector group activities in Europe. Their members produce, import and use over 300 PFAS in nearly all subgroups as defined by the OECD. FPP4EU does not represent individual PFAS substances, but represents the group as a whole.
- FPP4EU highlight their willingness for constructive dialogue with all stakeholders in the value chain and authorities.
- FPP4EU internally discussed if and how PFAS could be divided into several sub-groups, however FPP4EU did not find a way.
- FPP4EU developed a decision tree for PFAS to assess if a use should be part of the restriction proposal or if a derogation should be allowed.
- In December, FPP4EU will organize a next collaboration platform meeting, COM/DG Grow is invited to participate with two speakers (including keynote speaker).
- COM explained the process for the PFAS restriction and highlighted the importance to contribute to the public consultations. COM will internally discuss and come back to FPP4EU regarding the invitation to speak on the collaboration platform meeting.
