DJJ: will work closely to make cop success. Energy policy one of drivers, key investment for mitigation. These are not costs. Can help bring private investment. Build on GST through implementation - welcome work on similar pledge on storage and flexibility. Ready to work on success for storage pledge. For actual meeting in Baku - need a high level event on x3 and x2. Ministerial or higher. Ready to cohost with AZ. Also ready to do sth join in regional events in Cop bringing investors and project developers. H2 deliverable? Methane - still have GMP, cop29 to show progress on that. Socar could host a round table with OGMP companies and we'd be happy to participate.

AZ: all very interesting. Especially ministerial on GST. [REDACTED]

Countries in region - positive for this too.
