Subject: NBT Platform: final version Legal Briefing Paper

On behalf of [redacted] NBT Platform:

Dear Dorothee André,

As you know we have been working on a **Legal Briefing Paper** for the purpose of elucidating the regulatory status of plants developed using these NBTs with regards to Directive 2001/18/EC. Certain developments in the area of NBTs meant more time was required to finalise the document, but we are pleased to be able to send you our final version including a Summary Document, which we have also attached separately (see attachments).

A few weeks ago we have sent you and your colleagues a set of **Factsheets** explaining the various New Breeding Techniques. In case you haven't had the chance to read them, they can be found here: <http://we.tl/ivbfUknO49>

If you have any additional questions or remarks, feel free to contact us. We are always willing to meet and/or provide any additional information you might need.

And of course we are very curious about the progress you are making and we hope to be informed of any developments.
 Good luck with everything.

With best regards,

Rue Belliard 199, bte 22_1040 Brussels_
